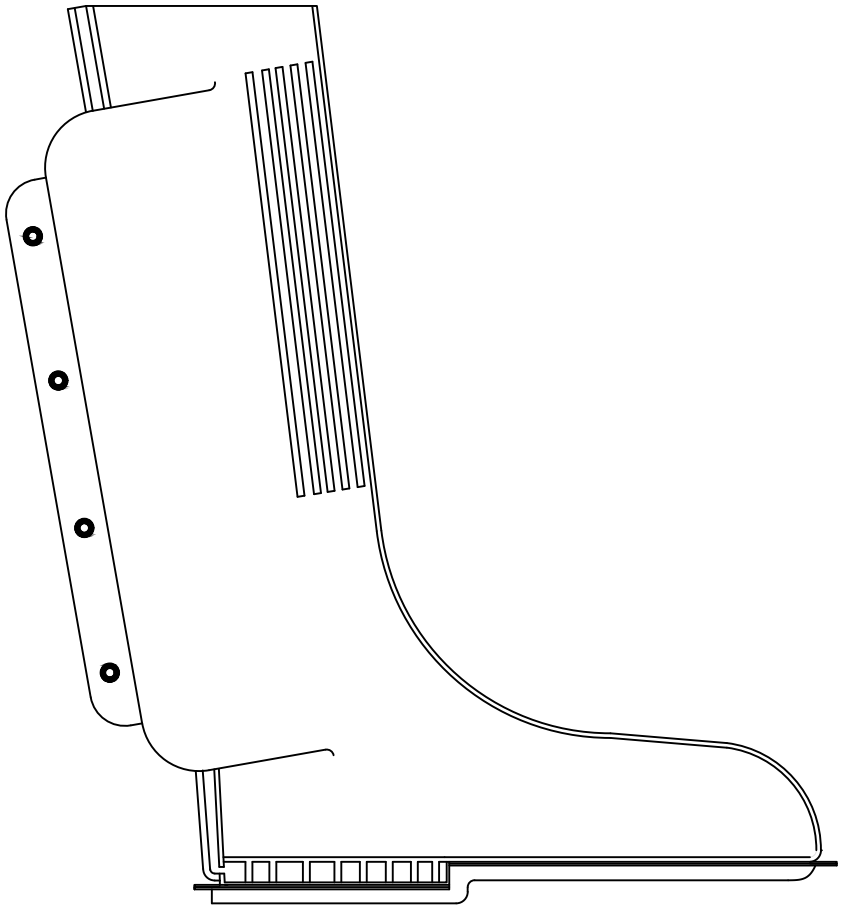
Farmer Safety Shoe

(Patent Apln. No.201621038917)

Thin invention could be used for protecting farmers from snake bite, glass pieces, thorns etc. in the field. Farmers all over, face problems like sever foot injuries when they get in to slushy and muddy fields with their naked feet. The special shoe developed for them is water proof and protects them from stray thorns, glass pieces, snake-bite and contact with other harmful creatures, as the shoes cover the feet fully almost up to the knee. They are made in standard size and will fit any one and can be tightened with the laze or clip provided. As a result, the shoe provides complete safety and protection to the wearer.

We also advise construction workers, workers in chemical factroies and those handing municipal waste to use them for safety and protection.



FARMER SAFETY SHOE
